Health Insurance Quotes

HealthInsuranceFinders is one of the largest sources of online health insurance quotes. We do not sell insurance directly because our mission is to help consumers find the lowest-cost medical insurance available, and that requires the forces of market competition. Consumers can perform a targeted specific search for health insurance coverage in states such as California, Florida, Georgia, Arizona or Texas. Our free service makes it simple for you to find agents in your state and request quotes. By requesting medical insurance quotes from multiple competing agents, you are creating incentive for agents to give you the best deal and you gain the ability to compare options side-by-side. This sets us apart from other major online medical insurance sites that allow you to compare and buy cheap health plans from them directly. Those sites may offer insurance from multiple carriers and allow you to compare plans, but they are earning money no matter what health insurance plan you choose, so there is more of an incentive to offer you more than you need.

What sets HealthInsuranceFinders.com apart is the fact that we are NOT a direct provider. Our only focus is to provide our customers with as much information and resources as possible, so that they can easily find the most affordable health insurance plans available. These resources extend far beyond just a free health insurance quote or price comparison--you will also find hundreds of informative medical insurance articles that cover all different types of insurance coverage, such as individual, family, group, business, private, short-term, dental, travel, international, and student insurance. Or if you prefer, you can browse by state to find entire pages dedicated to all plan types available to a certain area.
