## 2) Conclusions

- Asia is the largest 2-3 wheelers population area in the world with average engine of 50-125 cc.
- 2-3 wheelers inspection in regard to safety and emission is critical in Asia.
- Need to continuously improve the Quality system in vehicle inspection.

- Regulations adoption should be enforced
- Testing equipment for 2-3 wheelers are available in the region with affordable price
- Maintenance system should be a supplementary part to improve vehicle performance.
- Awareness raising on PTI across Asia
